

## **Background**

KCT (Kashmir Charitable Trust) is a UK based organization. In the upheaval of Oct; 8, 2005, with magnitude of 7.4 on Richter scale resulted in loss of thousands lives and properties to such an extent which shocked the Government and its institution. KCT immediately started helping the people. It toiled with the communities to attend to their instant relief needs and reached the people with relief services providing help to these marginalized communities.

Precedent the huge adversity of October 8; 2005, KCT has instigated many projects for the backing of earthquake hitters of this region. As using of tents is not the supreme protection solution for relocated community, particularly in intense cold & hot climates.

As substitute of protected cemented ceilings, the application of CGI sheets is the only alternative and KCT helped the folks by giving those CGI sheets worth 150 as 15 per family, thus the families are transformed as. Further than continued existence, protected haven is needed to give protection and safety, defense from the building blocks and improved struggle to bad healthiness and disease. Shelter is vital for man's self-esteem and for maintaining family units and life as far as possible in complicated state of affairs.

## **Need Assessment**

There was no any other way to live for the community of this distraught state, after earthquake. All the residencies were smashed badly, some were descended completely while a lot of were broken and devastated severely. There was neither such a protected spot for them to go and the powerful showery weather was forthcoming next to. There was really need of CGI sheets for making temporary houses by using them to fight against passionate weather conditions.

## **Objectives**

- To encourage the local community to fight against the situation created earthquake.
- To make sustainable the people of Tariqabad and bring them back to the routine life.
- To provide them shelters to leave in and to save their lives from the passionate warm weather.

## **Activity**

Just after the catastrophe, the warmth of the weather was becoming greater than before. As the community of this region has become hopeless as they were powerless for doing any thing for their survival.

The people of Tariqabad were also facing such conditions. As Tariqabad is a hilly as well

as concreted area of city Muzaffarabad, it was completely destroyed with this calamity. The residents of this area migrated in lower Tariqabad to save them selves. Most of the people were living on the roads in the tents because their houses were wrecked totally and some have fastened their tents in the fields but these tents were not fulfilling the requirement of this severe time. In this dangerous condition, KCT has launched a fundamental project in Tariqabad, in time distribution of CGI sheets in August 2006. This was the second distribution of CGI sheets from KCT within two months.

## **Methodology**

KCT, before every distribution, make the process of distribution transparent. To create transparency, the data collection team of KCT collects accurate data. Same has been done here, data of homeless people has collected, analyzed then the process of distribution has started. In this project, KCT has distributed 150 CGI sheets in the area of Tariqabad as donating 15 CGI sheets to each family.
